BioSafe Frame Kit

Tunnel Frame Kits

BioSafe Frame kit tunnels are manufactured from epoxy powder coated mild steel using our unique eZi Install clip in system for rapid simple deployment.

Purchase the knock down frame kit on its own or add the external branding covers for a complete tunnel.

Add your own pumps and nozzles to complete the system.

The frame kit has channels for running the hydraulic piping from the spray nozzles to the pump.

BioSafe Frame Kits are supplied in 3 models.

- 1.2m wide x 1.2m long x 2.5m high
- 1.2m wide x 2.0m long x 2.5m high
- 1.2m wide x 3.0m long x 2.5m high

Optional accessories include traffic lights, instruction stands and cloud based monitoring system with real time GPS location, equipment status and alarms, sanitiser level and use rates, people counter, temperature and humidity.

All tunnels are designed and manufactured in South Africa in our ISO9001:2015 certified facility.
